Ringtail™ 8

## Powerful. Flexible. Visual.

E-Discovery Never Looked So Good.

FTI™ CONSULTING | **TECHNOLOGY**

If you think you know Ringtail, think again. Now faster and easier than ever to use, no other review platform provides the power, scale and flexibility of Ringtail 8.

Fast, Defensible Document Review and Production

Corporate legal teams demand greater accountability for review costs and no aspect of the e-discovery process has greater impact than the speed and accuracy of document review.

With flexible workflows, intelligent reuse of data, visual document review, bullet-proof production and a new user interface, Ringtail 8 provides defensible, cost-effective review in a single platform. Whether deployed on premises or as a service, its unmatched scale and performance give you the confidence to handle the global requirements of even your largest and most complex projects.

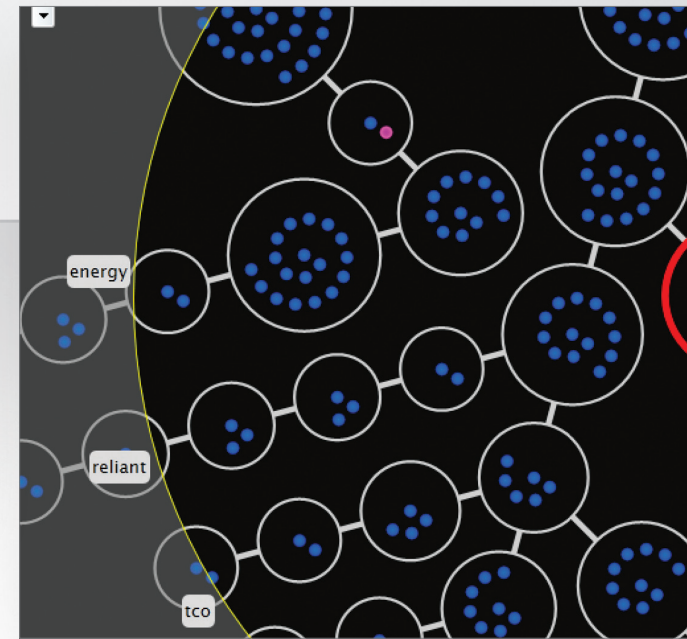

Find: Identify relevant and privilege terms in the same document using custom color multi-hit highlighting.

Find.

Ringtail 8 provides legal teams with smart ways to search and explore collected information across a wide variety of legal projects, from early case assessment to large-scale litigation.

- Use key documents and/or phrases found in search results proactively with Ringtail's one-click "find similar" command.

- Build, save and re-run advanced searches quickly using the "saved search" dashboard.

- Search across millions of documents within seconds using keyword search – with support for Boolean, proximity, fuzzy, wildcard, synonym and phonic searches.

- Sort, size and reorder columns on-the-fly to bring the most interesting documents to the front of the review queue.

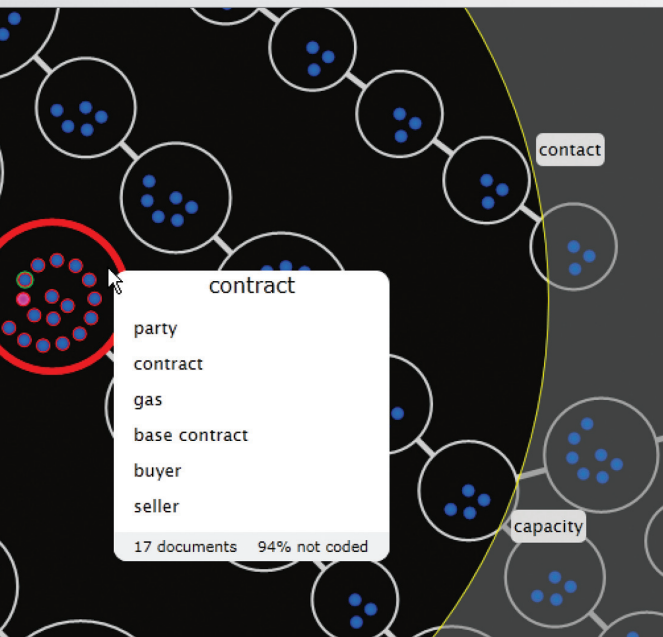

Analyze: Visualize & review search results, binders or assignments with Document Mapper.

Analyze.

Review teams spend less time searching and more time understanding then coding documents with Ringtail. The unmatched visual review and document analytics of Ringtail provide your team with a competitive edge, dramatically increasing review team productivity and efficiency.

- Explore documents based on conceptual similarity, search term matches, or term frequency to quickly identify trends.

- Dynamically interact with subsets of documents by reclustering on hot keywords to examine documents at a more granular level.

Review: Rapidly apply nuanced coding information to similar documents with coding history hints.

Review.

Legal teams can quickly and accurately analyze, review and categorize electronic information with Ringtail. With a highly configurable interface, Ringtail allows reviewers to maximize review throughput.

- Use the quick code palette to apply decisions to several documents at once.

- Redact documents using multiple colors and annotations.

- Create binders inline for quick collaboration and sharing of information or interesting documents during review.

- Review and produce foreign language documents.

Produce.

Ringtail's flexible production format and branding options coupled with comprehensive audit, search and version-tracking capabilities give you the confidence to fulfill even the most demanding production requirements.

- Manage and meet critical court deadlines and agreed-upon delivery dates.

- Easily view production history, document by document – even when documents are produced repeatedly in multiple jurisdictions.

- Optimize review timelines and protect privileged information.

- Batch print documents for offline review by attorneys in transit.

Efficiently Manage Multiple Matters

With support for tens of millions of documents in a single repository, Ringtail helps you manage collected information for multiple matters while also controlling the unique requirements for each individual matter. Collect, process, review and privilege code only once, and then reuse the information when new matters arise. Matter-appropriate documents are easily identified and accessed when a new matter begins without the need to collect and process again.

Collaborate with Confidence

The object-level security architecture in Ringtail provides complete control of the review environment for secure, multi-party collaboration. Administrators can easily manage access and permissions to documents and functionality such as redactions, tagging or annotations.

Scale Effortlessly

Ringtail was built from the ground up to scale to the demands of case requirements. Unlike other solutions that require making trade-offs that can impact review productivity when data volumes increase, Ringtail scales effortlessly when a small project suddenly increases in scope and size.

Ringtail 8

FTI Technology helps clients manage the risk and complexity of e-discovery. We collaborate with clients to develop and implement defensible e-discovery strategies with keen focus on the productivity of document review. Our complete range of offerings, from forensic data collection to managed document review services, provides unprecedented flexibility to address any discovery challenge with confidence. Our clients rely on our software, services and expertise to address matters ranging from internal investigations to large-scale litigation with global e-discovery requirements.
