rPhone

Toll-Free Telephony for Adobe® Connect™ that does more for less!

Let's talk!

Looking for telephony solutions in Adobe Connect that do more for less $$$?

The rPhone is an add-in pod that works in any Connect meeting room (Hosted or On-Premise) to provide features not available from other providers.

With the rPhone you can dial out from your meetings to users anywhere in the world. Direct dial landlines, cellphones, even SIP phones, including automated attendant codes or extension numbers. You can even program the system to dial out to a list of users who don't show up on time.

And for those who arrive a little late, our Voice-to-Text transcription feature lets them read what was said, and by whom, so they don't miss any of the important information.

There is no other solution that does as much and it probably costs less than your current provider.

Global Dialling - one all-inclusive rate

Toll Free N America + local access in 25+ countries

Free recordings and no taxes or service fees

On Demand Voice to Text Transcription
