## Fax Server Virtualization

The ReplixFax solution supports Virtual Fax Server configuration using Dialogic Brooktrout SR140 software.

The software-only ReplixFax Virtual Fax Server implemented with Dialogic Brooktrout SR140 software works with most leading VoIP and media gateway vendors such as Cisco, Avaya, Nortel, Alcatel, Siemens and Dialogic.

Benefits of Fax Server Virtualization:

- Improved server hardware utilization
- Reduced server hardware costs
- Simplified fax server configuration
- Fast fax server deployment
- Streamlined data center operations for greater efficiency
- Fast disaster recovery in case of failure

Highlights:

- Supported hypervisors include VMware, Microsoft Hyper-V and Citrix XenServer virtualization software
- Works with Dialogic Brooktrout SR140 FoIP software
